# 3G WIRELESS ALARM SYSTEM

The G5W alarm system is simple to use, reliable and an affordable solution for safety and security. Perfect for the home or business, the G5W alarm system is completely wireless and easy to install with all kit components pre-programmed and ready to operate straight out of the box.

Simply insert a regular SIM card with credit and have full mobile control of the system via the G5W app designed for Apple or Android smart phones. Arm or disarm the system remotely or use remote controls, RFID tags or the optional wireless keypad.

Store up to 5 mobile numbers and receive SMS alerts when the system is in alarm or when the system is turned off and by whom. No monitoring contracts to sign or monitoring fees to pay.

Use the optional signal repeater for larger installations and expand the system to 50 wireless sensors, 50 RFID tags and up to 10 remotes. With built-in lithium backup batteries, even when mains power is disabled and phone lines cut, your G5W Alarm will still function and alert you immediately if your home or office is intruded.
