

PSA LifeSaver

6000DCW

10 Year Lithium Battery
Smoke Alarm with
Wireless RF Interlink

10 Year
Warranty

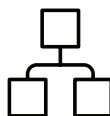

Tested & Complies to
Australian Standards
AS3786:2014

Protecting Australian families and homes has always been the priority for PSA Smoke Alarms. The latest version of the LIF6000DCW features our most advance system - a reliable, wireless solution designed to provide peace of mind.

**Dual Battery
System**

**Advance
Algorithm**

**Flow Plate
Design**

121mmD x 46mmH

Powered by a dual battery system, the LIF6000DCW delivers long-lasting protection without the worry of low battery chirps. Enhanced wireless connectivity and an improved particle detection algorithm mean the alarm sounds only when it truly matters. Built for Australia's humid conditions, the LIF6000DCW features a flow-plate design that promotes airflow through the detection chamber for more effective smoke detection, while reducing moisture and dust build-up.

Dual Battery System

Providing peace of mind for the life of the alarm, the LIF6000DCW's dual batteries independently power the operation and wireless connectivity, ensuring optimal performance throughout its 10-year lifespan.

Advance Algorithm

The new and improved Advance Algorithm ensures the 6000DCW and other connected devices maintain a secure wireless connection and reliable performance. Designed for dependable operation and peace of mind.

Flow Plate Design

The engineered flow plate is specially designed to direct internal airflow through the alarm, optimising smoke reaching the detection chamber, while reducing condensation and dust build up around the circuitry.

Anti-Static Detection Chamber

Designed to reduce false alarms, the detection chamber uses anti-static materials that repel dust, minimising dust build-up inside the alarm.

Advance Detection

With improved particle filtering algorithm, the sensor can more effectively distinguish between smoke and dust particles, reducing false alarms without compromising on fire detection.

Ultra Small Insect Screen

Fitted with a 0.8mm bug mesh, to minimise insect contamination, helping to reduce false alarms and lower maintenance requirements.

Quick Twist Mounting

Quick and easy to install, the alarm features a simple quick-twist mounting base for fast, hassle-free setup.

10

10 Year Warranty

Backed by a 10-year warranty, PSA guarantees the quality of the alarm to protect homes and families for its entire lifespan.

Local Technical Support

Our tech support team is local to Australia, operating out of Melbourne and Brisbane, ensuring top quality assistance, whenever its needed.

Complete Solution

The 6000DCW provides a complete solution to home safety. Wirelessly compatible up to 24 devices including the smoke alarm controller LIF6000THL and wireless base LIF6000WB for mains powered smoke alarm LIF6800 series.
