FAQs

Q1 What should I do if I have forgotten the password or the ID/Password card is missing?

Ans Please press the Reset button for five seconds. The IP camera will reset to the factory default settings. The default video-play password is yescam (lowercase).

Q2 What should I do if I cannot see the video remotely?

Ans The red LED of the IP camera should be remain on when the IP camera is connected to the Internet. If the red LED is blinking, please double check the network connection and settings again.

Q3 I can see the video in a remote place, but the video quality is not good and sometimes the video would disconnect and then reconnect again by itself.

Ans It's probably because the internet bandwidth (internet speed) is not big enough. Please try to apply for a better internet connection from your Internet Service Provider or decrease the bandwidth setting of the IP camera.

Q4 What is the default admin user name/password?

Ans Default admin user name: admin
Default admin password: _____ (leave blank)

Q5 Where to download the latest YesCam View software?

Ans Please refer to the following website to download the latest YesCam View software. www.yescam.com
