

**PRODUCT ACCESSORIES**

**VM32**  
32-image video memory. The module is wall-mountable near a Project videointercom.

Power supply: 13 Vac/dc  
Dimensions: 133 x 130 x 42

**PT501**  
Single button unit.

**PT502**  
LED module for door open indication and other functions.

**PT515**  
Switch module to cut out ringer (privacy) or other functions.

**PT538**  
Desk adapter with weighted base, connector block and connection cable with thirteen 2.4m wires.

**SR40**  
Electronic ringer module for systems with alternate current call. When installed inside the intercom, it allows the buzzer call to be replaced by the electronic call or a call to be added, e.g. a call from landing.

**SR41**  
Electronic buzzer module for parallel call of various intercoms in systems with electronic call.

**SM50**  
Private conversation module for systems with alternate current call. When installed inside the intercom, it allows only the called user to be put in communication with the external door station.

**1283**  
Back box for video intercom PT5660W.  
Dimensions: 175 x 126 x 60.

**TA5160**  
Desk adapter with 20-wire connection cable and mounting bracket for video intercoms PT5160 PT5160W and PT5160W-LCD. It can be used in both the basic applications and in applications with additional buttons and/or secondary call tone.

**WB5100**  
Wall-mounting bracket for video intercom system PT5160, PT5160W and PT5160W-LCD. For 2 non-extendable buttons.

**WB5160**  
Replaces the previous bracket when additional buttons and/or secondary call tone are requested.

**WB5600**  
Wall-mounting bracket for video intercom PT5860W. For 2 non-extendable buttons.

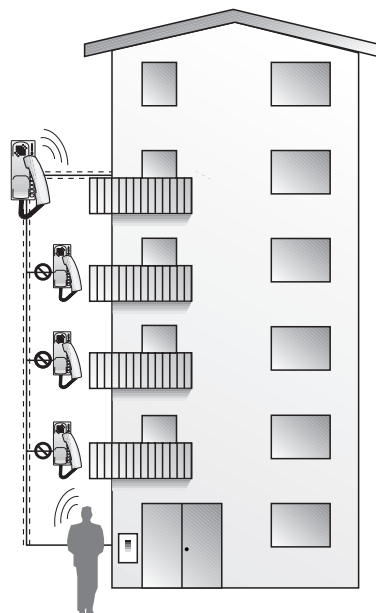

**WB5660**  
Replaces the previous bracket when additional buttons and/or secondary call tone are requested.

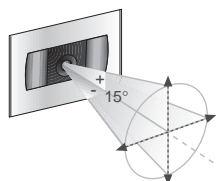

**WB5111E**  
Wall bracket with terminal boards for wall-fixing of PT5111E and PT5111EW videointercoms.

**SM50E**  
Private conversation module for systems with electronic call. When installed inside the intercom, it allows only the called user to be put in communication with the external door station.

**CCD CAMERA MODULES**  
The videointercoms of Project series are compatible with new pan/tilt Mody camera modules, with lenses which angle is mechanically adjustable during the installation +/- 15° horizontal, +/- 15° vertical.

**MD41C**  
Colour/ fixed 3.6mm lens/pan/tilt horizontal and vertical  
124 x 90 x 18.

CCD camera module with 6 infrared LED's and autoiris.

**MD41**  
Black/white/ fixed 3.6mm lens/pan/tilt horizontal and vertical  
124 x 90 x 18

CCD camera module with 6 infrared LED's and autoiris.

**MD41D**  
Black/white/ fixed 3.6mm lens/ for 4+1 systems without coaxial cable  
124 x 90 x 18

CCD camera module with 6 infrared LED's and autoiris.

# Project

## Easy, Practical, Modern

■ PT5111EW  
■ PT5160W  
■ PT5160W-LCD

## Technology

The technological evolution of the Project series guarantees even more performances in the various systems, conventional and digital ones. Aci Farfisa add to its offer PT5111E and PT5111EW intercoms, that work with PRS210E transformer, and PT5111EW videointercoms: reliability in working and quality for audio assured by 4+1 videointercom system with electronic call, generated by 1181E power supply.

## Integrability

Project intercoms and videointercoms are perfectly suitable to FN4000 and DF6000 digital technologies; flexible functions and advanced services even for few users are guaranteed.

## Practicalness

**KITS WITH PROJECT INTERNAL STATIONS**  
Intercom and videointercom kits of Project series are high-quality and functional, easy to install and to use.

### INTERCOM KITS

The intercom kits are suitable for one and two-way installations, available with conventional 4+1 technology, with reduced number of wires (1+1) or with two wires technology. They are also compatible with Mody and Up push button panels.

### VIDEOKITS

The videokits contain everything necessary for a one or two way installation. They are available with surface mounted FLAT videointercoms, flush mounted SEMI FLUSH videointercoms or Reflex surface mounted videointercom. They are available with coax cable or 4+1 technology without coax cable.

VIDEOINTERCOMS	Colour and dimensions	System	Functions	Microphone+screen	Accessories
PT5160 Surface mounted FLAT video intercom with 4" monitor	two-colour 215x215x89	System with coax cable.	2 buttons, one for door-opener and one for Camera Recall, and secondary call tone expandable to 8.	Electronic microphone + b/w monitor.	TA5160, WB5160, WB5100
PT5160W Surface mounted FLAT video intercom with 4" monitor	white 215x215x89	System with coax cable.	2 buttons, one for door-opener and one for Camera Recall, and secondary call tone expandable to 8.	Electronic microphone + b/w monitor.	TA5160, WB5160, WB5100
PT5660W SEMI FLUSH mounted video intercom with 4.5" monitor	white 212x233x113	System with coax cable.	2 buttons for door-open and Camera Recall, and secondary call tone expandable to 8.	Electronic microphone + b/w monitor.	WB5660, WB5600, 1283
PT5860W Surface mounted REFLEX video intercom with 4.5" monitor	white 212x233x113	System with coax cable.	2 buttons for door-open and Camera Recall expandable to 8.	Electronic microphone + b/w monitor.	WB5660, WB5600
PT5160W-LCD Surface mounted video intercom with LCD 4" colour screen	white 215x215x89	System with coax cable.	2 buttons for door-open and Camera Recall expandable to 8.	Electronic microphone + colour monitor.	TA5160, WB5160, WB5100
PT5111E Surface mounted FLAT video intercom with 4" monitor	two-colour 215x215x89	The videointercoms are connected with 4 common wires plus one for each apparatus; electronic note call	2 buttons for door-open and Camera Recall.	Electronic microphone + b/w monitor.	WB5111E
PT5111EW Surface mounted FLAT video intercom with 4" monitor	white 215x215x89	The videointercoms are connected with 4 common wires plus one for each apparatus; electronic note call	2 buttons for door-open and Camera Recall.	Electronic microphone + b/w monitor.	WB5111E
